

Position Title: Transportation Project Engineer

OCI is a full-service civil engineering firm that focuses on water resources, utilities, and environmental services, including engineering, modeling, and analysis for transportation, development, restoration, and mitigation projects. Since 2004, OCI has steadily grown, projecting above industry average growth for the next several years. Therefore, we are expanding and looking for a bright, energetic **Project Engineer** who has experience in all aspects of transportation, stormwater, and utility design.

This position is an excellent career opportunity for the right individual who desires to make an impact in a privately held small business. At OCI, we believe our success stems from each and every individual employee. Our employees are well organized, thorough, trustworthy, have excellent verbal and writing skills, and the ability to multi-task. Following are general responsibilities for the position:

- Position provides a significant breadth and depth of technical experience to analyze and evaluate complex design problems efficiently.
- Responsibilities include engineering of reports and design drawings.
- Coordinates technical effort within his/her design areas.
- Provides design solutions for projects within budget and time schedules, ensuring compliance to applicable codes, accepted engineering practices, and client and OCI standards.
- Provides Project Management support and task management on projects.

Experience, Competencies and Education Requirements:

- Bachelor's degree in Civil Engineering;
- Currently hold EIT or PE certification.
- 5-8 years of experience in design, planning, and implementation of civil design projects.
- Experience designing transportation projects for Sound Transit, WSDOT, and local agency projects is preferred.
- Experience designing Washington state Municipal public works projects including design and construction of streets, highways, bridges, sewer and storm drain hydraulics and hydrology, and other public works facilities and infrastructure projects is preferred.
- Principles and practices of project design and design development through the use of computer aided design software; AutoCAD Civil3D, MGSFlood, WWHM, MicroStation, INRoads, SWMM, etc.
- PS&E Development.
- An energetic individual with high ethical standards and an appropriate professional image.
- Active participation in industry organizations such as APWA, WTS, ACEC, ASCE, etc.

Language Skills Requirements:

- Ability to read, analyze, and interpret complex engineering documents.
- Ability to make effective and persuasive speeches and presentations on complex topics to staff, clients, and industry peers.
- Ability to communicate and interact with peers, and to work effectively in a diverse community.
- Ability to develop clear design report documentation and technical appendices.

OCI offers competitive pay (depending on experience), fully subsidized Good To Go pass, medical and dental insurance for the employee, 401K plan with company matching, PTO/holiday pay, and profit sharing. We are conveniently located in Downtown Bellevue, 6 blocks north of the Bellevue Library. Work Hours are generally Monday through Friday, 8AM to 5PM, but for the right candidate are willing to consider a flex schedule. If you are interested in this position, please email your **cover letter** and resume to info@osbornconsulting.com. Please include in your cover letter a thoughtful explanation of why you think you are a good candidate for this position. **Responses without a cover letter will NOT be considered.**

No calls, please. We will contact you if we desire to arrange an interview with you. Thank you.

Osborn Consulting, Inc (OCI) is a diverse group of enthusiastic and competitive professionals who value relationships, collaborative decision-making, and a quality work/life balance while continuously striving to provide an outstanding work product and client experience.
